

REMARKS

Applicants' previously amended the Title of the present application in the Response/Amendment filed November 30, 2003, however, the Notice of Allowance did not indicate that the change had been made to the Patent Office records. The present amendment to the Title is being requested to insure that the patent issues with an appropriate Title. No substantive or new matter issues are raised by this amendment.

Applicants have also requested an amendment to the Specification requested in order to make a correction to the status of an application listed in the paragraph describing the continuing data and chain of priority documents claimed by the present application. No substantive or new matter issues are raised by this amendment.

Lastly, Applicants have requested an amendment to the Specification in order to correct an inconsistency found in the brief description of Figure 5 as the result of the submission of formal drawings, concurrent herewith. During Applicants' preparation of formal Fig. 5, the pagination of this figure went from 11 pages to 18 pages. Accordingly, Applicants have requested an amendment to the Specification that makes reference to Figure 5 (A)-(R) rather than Figure 5 (A)-(K). No additional changes have been made to the Fig. 5.

The foregoing amendments are being submitted no later than the payment of the issue fee. Applicants respectfully request consideration of the amendment pursuant to 37 CFR § 1.312. Applicants respectfully request entry of the amendments.

Applicants believe that no additional fee is due to enter the above amendments, however, the Commissioner is hereby authorized to charge any filing fees which may be required or credit any overpayment to Deposit Account No. 01-0519 in the name of Amgen Inc.

Please send all future correspondence to:
